

1. Given the database table `bigquery-public-data.listenbrainz.listen`:

How many individual users (user_name) listened to either the track 'Thrills' or the track 'Sons Of Ghosts' (track_name) by the artist 'EF' (artist_name) in 2010 UTC (listened_at)?

```
SELECT COUNT(DISTINCT user_name) AS num_users
FROM `bigquery-public-data.listenbrainz.listen`
WHERE artist_name = 'EF'
AND (track_name = 'Thrills' or track_name = 'Sons Of Ghosts')
AND listened_at >= '2010-01-01 00:00:00 UTC'
AND listened_at < '2011-01-01 00:00:00 UTC';
```

2. Given the database table `bigquery-public-data.san\_francisco\_sffd\_service\_calls.sffd\_service\_calls`:

How many calls had a final priority (final_priority) of 3 in the area of 94103 (zipcode_of_incident) in August 2008 UTC (call_date)?

```
SELECT COUNT(*) AS call_count
FROM `bigquery-public-data.san_francisco_sffd_service_calls.sffd_service_calls`
WHERE final_priority = 3
AND zipcode_of_incident = '94103'
AND call_date >= '2008-08-01'
AND call_date < '2008-09-01';
```

3. Given the database table `bigquery-public-data.listenbrainz.listen`:

What track (track_name) had the highest number of listens by an individual user (user_name)?

```
SELECT track_name, user_name, count(user_name) As highest_track_count
FROM `bigquery-public-data.listenbrainz.listen`
GROUP BY track_name, user_name
ORDER BY highest_track_count DESC
limit 1;
```

4. Given the database table `bigquery-public-data.sunroof\_solar.solar\_potential\_by\_postal\_code`:

What state has the highest number of solar panels installed (number_of_panels_total)?

```
SELECT state_name, SUM(number_of_panels_total) AS total_panels
FROM `bigquery-public data.sunroof_solar.solar_potential_by_postal_code`
GROUP BY state_name
ORDER BY total_panels DESC
LIMIT 1;
```

5. Given the database table `bigquery-public-data.new\_york\_taxi\_trips.tlc\_yellow\_trips\_2022`:

What was the average number of passengers (passenger_count) for trips that visited an airport (airport_fee)? (Round to the nearest tenth.)

```
SELECT ROUND(AVG(passenger_count), 1) AS avg_passenger_count
FROM `bigquery-public-data.new_york_taxi_trips.tlc_yellow_trips_2022`
WHERE airport_fee IS NOT NULL;
```

6. Given the database table `bigquery-public-data.san\_francisco\_sffd\_service\_calls.sffd\_service\_calls`:

What is the call_number (call_number) of the northernmost Electrical Hazard call (call_type) in 2017?

```
SELECT call_number
FROM `bigquery-public-data.san_francisco_sffd_service_calls.sffd_service_calls`
WHERE call_type = 'Electrical Hazard'
AND call_date >= '2017-01-01'
```

```
AND call_date < '2018-01-01'  
ORDER BY latitude DESC  
LIMIT 1;
```

7. Given the database table `bigquery-public-data.new\_york\_taxi\_trips.tlc\_yellow\_trips\_2022`:

What was most common pickup_location_id for trips with more than one passenger (passenger_count)?

```
SELECT pickup_location_id  
FROM `bigquery-public-data.new_york_taxi_trips.tlc_yellow_trips_2022`  
WHERE passenger_count > 1  
GROUP BY pickup_location_id  
ORDER BY COUNT(*) DESC  
LIMIT 1;
```
