

Assignment 2

Crafting and Articulating that Compelling Story

You have been hired by a cool animation startup in LA to analyze the works of Rajiv Chilaka and Martin Scorsese using data from a Netflix dataset containing listings of all movies and TV shows available on Netflix. The goal is to draw insights and recommend strategies for countering the threat of GenAI-generated movies.

Dataset Details

- **Dataset:** Tabular data of Netflix listings including movies and TV shows.
- **Contents:** Cast, directors, ratings, release year, duration, etc.
- **Context:** Netflix has over 8000 movies/TV shows and 200 million+ subscribers globally (as of mid-2021).

Deliverables

1. **One-page Executive Summary:** Detail analysis, insights, and recommendations.
2. **One Killer Figure:** A compelling visualization supporting key findings or recommendations.
3. **Appendix (optional):** Additional supporting analysis.

Grading Criteria

1. **50% “Crafting the Compelling Story”:**
 - Depth and relevance of insights from data analysis.
 - Effectiveness of recommendations against GenAI threats.
 - Originality and creativity of approach.
 - Ability to identify and leverage key data relationships, trends, patterns.
2. **50% “Articulating the Compelling Story”:**
 - Clarity, coherence, organization of executive summary.
 - Use of effective visualizations.
 - Clear communication of complex ideas.

Grading Rubric

	Poor	Good	Excellent
Content Quality (50%)			
✓ Depth and relevance of insights from data analysis (30%)	Failed to include basic data exploration steps to understand the dataset.	Included some data exploration steps. Showed a clear understanding of the data and its relevance to the insights.	Included in-depth data explorations and showed a deep understanding of the data and its relevance to the insights.
✓ Ability to identify and leverage key relationships, trends, and patterns in the data (10%)	Based on data exploration, the student was unable to identify key relationships and trends that guided the generation of insights.	Based on data exploration, the student identified key relationships and trends that guided the generation of insights.	Based on data exploration, the student identified unique relationships and trends that guided the generation of insights.
✓ Effectiveness of recommendations for countering GenAI threats (10%)	Given the context, the student did not identify a reasonable GenAI threat.	Given the context, the student identified a reasonable GenAI threat.	Given the context, the student identified a unique GenAI threat and provided data-supported evidence for their recommendation.
Presentation and Communication (50%)			
✓ Use effective visualizations to support findings and recommendations (30%)	The one killer figure does not convey the “big idea” clearly.	Like the “show-and-tell” exercises. The one killer figure effectively conveyed the “big idea”.	The one killer figure included creative components and conveyed the “big idea” clearly.
✓ Clarity, coherence, and organization of the executive summary (20%)	The executive summary is poorly written and lacks coherence.	The executive summary is well written.	The executive summary is well written and follows a clear flow of ideas.
