PROFESSIONAL SUMMARY

Healthcare Analytics professional with 6+ years of experience across oncology, neuroscience, cardiovascular, and rare disease portfolios, delivering data-driven insights to support commercial decision-making and strategic planning

Experienced in patient flow modeling, scenario analysis, and KPI tracking to evaluate revenue performance, market opportunities, and launch readiness across global markets

Skilled in SQL, Python, Excel, and BI tools to translate complex healthcare data into actionable insights, driving stakeholder alignment, commercial strategy, and measurable business outcomes

EDUCATION

Purdue University, Daniels School of Business	West Lafayette, IN
<i>Master of Science in Business Analytics and Information Management</i>	<i>August 2025 to December 2026</i>
<i>Coursework: Data Mining, Visual Analytics, Machine Learning, AI for Business, Spreadsheet Modeling and Simulation</i>	
Vellore Institute of Technology	Vellore, India
<i>Bachelor of Technology in Mechanical Engineering</i>	<i>July 2013 to May 2017</i>

SKILLS & CERTIFICATIONS

Languages and Automation: Excel (Advanced), PowerPoint (Advanced), VBA, SQL, Python (Pandas, NumPy), R, Git

BI and Visualization: Tableau, Power BI, Qlik Sense

Data and Engineering: MS Access, BigQuery, MongoDB, Data Modeling, Data Profiling, Data Mapping, Data Validation, ETL Concepts

Forecasting and Analytics: Patient Flow Modeling, Market Sizing, Scenario and Sensitivity Analysis, KPI Tracking, Forecast vs Actual Analysis, Time Series (ARIMA), Regression

Cloud and Certifications: AWS (S3, Redshift, SageMaker Studio), Microsoft Azure

PROFESSIONAL EXPERIENCE

PharmaACE Analytics Consulting Intern	<i>January 2026 to Present</i>
• Forecast Platform Automation: Designing data pipelines and validation frameworks for a web-based forecasting platform, improving data integrity and enabling scalable, client-ready analytics delivery	
Purdue University, Krenicki Center for Business Analytics and Machine Learning, West Lafayette, IN	<i>October 2025 to Present</i>
<i>Student AI and Data Science Engineer (Accenture), Part-Time</i>	
• Client Workflow Design: Mapped SAP S/4HANA AR processes and defined automation rules for disputes and cash application, enabling structured decision workflows and stakeholder alignment • Process and Data Documentation: Designed future-state swimlanes with inputs, outputs, controls, and data dependencies, supporting operational readiness and effective business workshops	
Novartis Senior Lead Business Analyst	<i>July 2023 to July 2025</i>
• Prostate Cancer Portfolio Analytics: Led scenario-based model updates incorporating patient journey dynamics including diagnosis, treatment initiation, and line-of-therapy transitions to support strategic planning decisions • Lung Cancer Launch Analytics: Built demand and adoption models for a \$1.2Bn asset using patient flow, uptake curves, and market inputs, improving forecast accuracy by 70% and supporting commercial strategy and resource allocation • Radioligand Therapy Market Modeling: Developed EU country-level models integrating epidemiology, access, and competitive dynamics to guide market entry sequencing and investment prioritization	
Genpact Lead Analyst	<i>October 2022 to July 2023</i>
• Cardiovascular Performance Analytics: Built a multi-country analytics solution with Power BI dashboards, standardizing KPIs and improving decision visibility while increasing prediction accuracy by 80%, leveraging SQL-based data extraction and transformation	
Novartis Business Analyst	<i>January 2021 to October 2022</i>
• Submission Automation and Governance: Rebuilt VBA-based workflows with validation and audit trails, improving data quality and enabling 100% on-time submissions • Migraine Revenue Analytics: Modeled \$800M brand performance and built Qlik Sense dashboards linking assumptions, scenarios, and KPIs, enabling structured business reviews and variance tracking	
ZS Associates Decision Analytics Associate	<i>July 2019 to December 2020</i>
• Oncology Commercial Diligence: Built models and dashboards for a \$3.5Bn M&A case, delivering scenario insights that accelerated executive decision-making • Market and Patient Analytics: Integrated clinical and secondary data sources to refine market assumptions and identify commercial opportunity areas, driving a 10% increase in projected revenue	

PROJECTS

- **Venture Capital Market Intelligence:** Built Python pipelines and BigQuery models using SQL window functions to identify trends, anomalies, and investment signals
- **UFC Event Analytics and ROI Modeling:** Developed regression-based scoring on 6,000 fights to identify high-value cities, optimizing event planning decisions
